

Simon at about 21:35hrs was called for his prescribed night medication. He was given his 1mg Lorazepam and 5mg Olanzapine tablet as prescribed for the night. He refused the 5mg Olanzapine, with claim that ward doctor that prescribed the medication did not discuss Olanzapine with him. He also went further to contradict himself that same prescribing doctor has instructed him that he doesn't have to take any anti-psychotic medication. Nursing staff then tried to explore the reason why he don't want to take his medication; Perhaps due to taste or difficulty in swallowing, so that alternative route could be explored when feeding back to the MDT during white board meetings. Instead of listening to the staff talking to him, he claimed to have taken picture and recording the staff present during the interaction. At this point, the staff asked him to delete the content if he had actually did that because its not with his consent and its not an acceptable practice.

Instead of deleting the content of what he might have taken, he ran to his room to phone his mother, that he was being advised to take his prescribed medication against his will and that he could be given injection if he continue to refuse medication orally.

The mother then phone the ward to inform the ward staff GD that her son, if going by the previous judgment they have got from the Supreme Court. Simon has the right to record any interaction at any public place, in which hospital is one of them. The mother went further to inform staff that she has spoken with the team doctor (no name given) about her son medication and that it was an agreement that Simon should only be taken 1mg Lorazepam now while subsequent medication review has to be weekly. Hence, they have not done further review, no staff should encourage son to take any anti-psychotic medication prescribed on the ward. The mother claimed that the said doctor and her were of the opinion to wait and see how Simon reacts to Lorazepam before he can think of taking any other medication. In addition to the above, Simon himself played the audio recording of interactions with doctor and social workers from the previous encounter, when trying to delete the one he did tonight. He then claimed that he has not present this recording in the court because he doesn't want that social worker in the recorded content sacked. However, the shift coordinator advised the mother to work with care team in a way that could enhance the best interest of Simon. Also, to encourage son to be compliant with his treatment plan as an inpatient on the ward. Furthermore, Simon to stop recording and taking picture of caring team without their consent because, its not part of treatment package.
