

don't like people around there, which it has made it harder for the family to be there all the time to support him because of how and what he is living in with what the neighbours and Enfield Council has been doing.

Therefore I am asking for some help for a letter to be written from the mental health team saying a 2 bedroom would be more suitable as Simon could have someone with him and still be able to have his own space, as there would be a spare room for the family to stay in.

Regards
