---

Hi Simon

Could you please have a look at these picture and let me know if these are the parts you require.

Hello, hope all is well I have been asked to forward this email to yourself's in regards to parts for a Morgana 150 pur machine that I have recently been trying to fix.

The parts and prices that I request are as follows:-

1. **Thermostat, Solder Tag the markers on the original part are; Termination, 0°C +460°C - 2455rc - 9082 - N47 - 12 L200c.**
2. The different prices of the blue beans needed to clean the machine.
3. The different prices of the glue need to fill the machine.

**I also ask if there should be a Semiconductor contained in the machine within the distribution board at the back: code numbers**

**1. KM20.01**

**2. KM23.01**

If so what is the part number and how much does Morgana supply them for?

Many thanks and kind regards  
Mr Simon Cordell
