

The parts and prices that I request are as follows:-

1. Thermostat, Solder Tag the markers on the original part are; Termination, 0°C +460°C - 2455rc - 9082 - N47 - 12 L200c.

2. The different prices of the blue beans needed to clean the machine.

3. The different prices of the glue need to fill the machine.

I also ask if there should be a Semiconductor contained in the machine within the distribution board at the back: code numbers

1. KM20.01

2. KM23.01

If so what is the part number and how much does Morgana supply them for?

Many thanks and kind regards  
Mr Simon Cordell
